

Chantal Rainford

Chantal is the Clinic Director at Nevada Autism Center in Las Vegas and is passionate about delivering high-quality ABA that maximizes the therapeutic benefit of each therapy hour. Having a child diagnosed with autism who received ABA for several years has given Chantal an uncommon perspective, compassion, and understanding for families that share this experience.

Chantal joined the field of ABA in 2007, and has worked in multiple clinical levels from being RBT, BCaBA then BCBA. Chantal earned her master's degree in Behavior Analysis at Southern Illinois University. Chantal is also a U.S. Navy Veteran

What is your experience and/or comfort level w/ website design and creating social media content?

My experience with social media content is limited to the extent I have used it to represent our company Nevada Autism Center. Please check out our [Facebook](#), [website](#) or [Instagram](#) for a representation of that work.

This position requires the ability to prioritize tasks and task-switch as needed. What experience do you have that lends well to these skills?

My position as a clinical director and opening an ABA company requires me to prioritize tasks. My experience there would help me as at large rep.

What would you like to bring to this position? What do you feel makes you a good fit?

I believe I would offer a fresh perspective from Las Vegas from as an individual with a strictly clinical background. My priorities have always been clinical work and client outcomes and that would remain consistent as an at large rep..
